ICCX West Africa 2023

For over 20 years CPI – Concrete Plant International, the leading trade journal for the concrete industry – has been providing concrete professionals worldwide with up-to-date technical information and news - from around the world. CPI was founded out of the need to address the opportunities and challenges of the globalization in the concrete industry.

As the demand for information and technology grew, CPI introduced ICCX conferences. The trademark of ICCX is a unique combination of conference and trade exhibition, covering all aspects of modern concrete production and technology. This format gives suppliers to the concrete industry the opportunity to meet face-to-face with decision makers in a technical setting.

ICCX West Africa will be the new meeting point for the concrete and precast industry. Located in Ghana that is considered to be the entry point for the English speaking countries in Western Africa the event will be organized on April 25-26, 2023. International machinery suppliers from all over the world will be present in the trade exhibition, and in parallel a technical conference will provide up-to-date knowledge for the concrete and precast industry.

Date Aril 25-26, 2023

Times* Opening 09:00 – 18:00
Conference 10:00 – 17:00

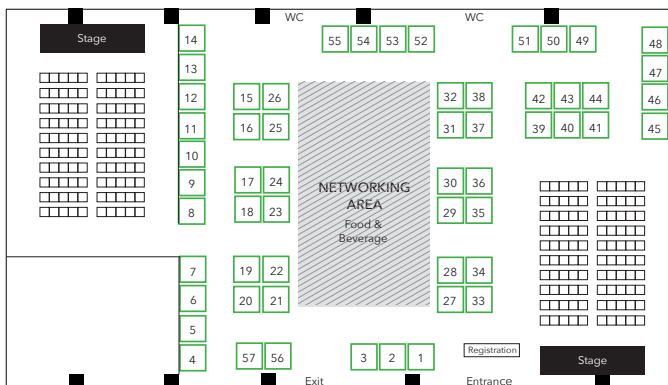

Participants 300+ concrete and construction industry professionals
